

CANADA'S LARGEST TEMPERATURE SENSITIVE SUPPLY CHAIN SOLUTIONS COMPANY FURTHER EXPANDS GLOBAL REACH BY OBTAINING APPROVALS TO EXPORT FISH TO TWO KEY MARKETS – THE EU AND CHINA

April 11th, 2018 -- VersaCold Logistics Services is pleased to announce that 21 of its refrigerated warehousing facilities have received approval to export fish to the People's Republic of China and 17 have been approved to export fish to the European Union (EU) as of April 2018. The new approvals mean that VersaCold now operates a total of 21 refrigerated warehousing facilities in Canada approved to export fish to these two key global markets. The facilities are located across Canada's east to west coast and give VersaCold the largest geographical footprint of refrigerated warehousing facilities to receive the approvals in the country.

The approved facilities – located in all provinces across Canada with the exception of Ontario – are in compliance with all aspects of *the Fish Inspection Act and Regulations*, and were approved following a rigorous review process.

"VersaCold is always seeking opportunities to confidently meet the growing needs of our customers and we are extremely proud of these approvals to export fish to two key global markets," said Douglas Harrison, President and CEO of VersaCold. "In 2016, we announced our approval to export beef and pork to China, and at that time I noted that we would strive to expand our reach globally. In light of the most recent developments with CETA, and the anticipated reductions in fish export tariffs, it's more important than ever for Canadian businesses to look to key markets like Europe for their growth ambitions. Today's announcement affirms our commitment to supporting our customers as they adapt to a changing global marketplace and is proof of our dedication to being their most trusted, long-term partner. Business success and revenue growth for our valued customers is our utmost priority, and we will continue to expand our service offering and the regulatory approvals of our facilities to help our customers achieve a competitive edge."

The 21 VersaCold Facilities approved to export Fish to China are:

- VersaCold Dawson (Winnipeg, Manitoba)
